

BreatheSpace

Mental Health chatbot 🤖

Women in Technology Hackathon Team18

Has anyone ever truly never felt stressed?

Personality Test

Anxiety and management vary by individual (Storm, 2020).

Our Chatbot starts with a **simple personality test**.

Helps tailor **anxiety assessments** and **solutions** based on personality type

Chatbot

Combined Voice and Text Interaction

Engages in natural, everyday conversations like talking to a friend.

Mental health assessment through personalized anxiety checks based on personality traits.

After evaluating anxiety, it provides custom solutions based on severity.

Data collection and visualization

The chatbot logs each interaction, anxiety check, and solution.

01

Users can monitor their progress and gain insights into their mental health over time.

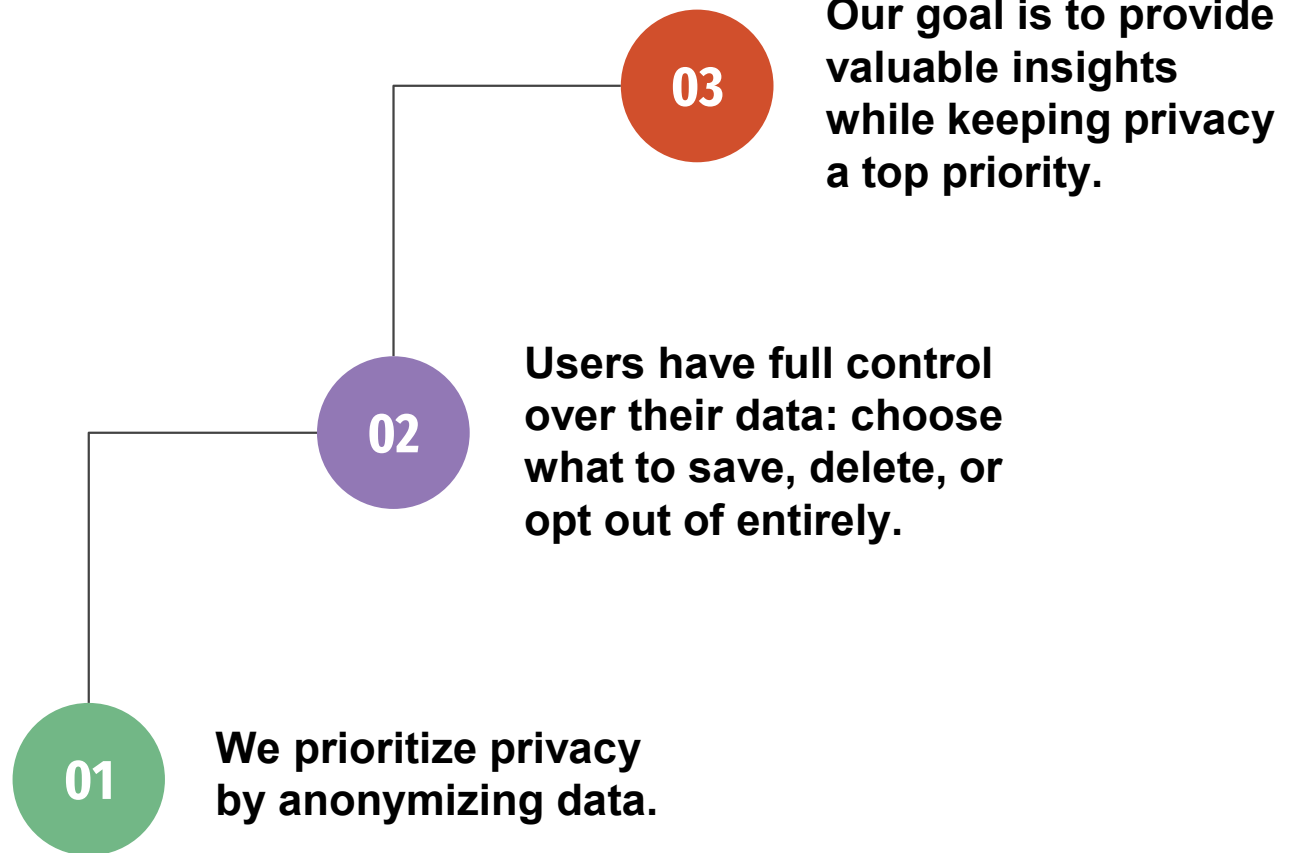

02

Addresses a gap where other platforms don't retain user data.

03

Data Privacy Concerns
